

After extensive research and field testing, the Angle Port Kinetic Weighted End Cap is the perfect accessory for the semi-auto sport shooter and hunter. It doesn't obstruct the shooters field of vision, improves gun swing while reducing muzzle flip and recoil.

The Kinetic Weighted End Cap is CNC machined from solid aluminum bar stock, factory weighted, and anodized with a durable finish that compliments the guns appearance. And easily installs in place of the factory end cap.

Installing the Kinetic Weighted End Cap:

Remove the factory end cap from the fore-end magazine shaft of the semi-auto and simply thread on and tighten the Kinetic Weighted End Cap.

Practice Good Gun Safety!

Always make absolutely sure the firearm is
UNLOADED before proceeding
with any disassembly.
